

METHOD, APPARATUS, SYSTEM, AND ARTICLE OF MANUFACTURE FOR  
GENERATING INTERRUPTS

5

ABSTRACT

Provided are a method, apparatus, system, and article of manufacture, wherein in one embodiment of the method a plurality of timers may be configured with interrupt event arrival rates. A rate of arrival of one or more interrupt events may be measured. An interrupt may be asserted in response to the measured rate of arrival of the one or more interrupt events being lower than the interrupt event arrival rates.
